## Bob Bickers

March 3 - 31, 2004 at the Undercroft Gallery

While contemporary artistic expression featuring the art of the American Indians of the American Southwest are not uncommon, art depicting the ancient cultures that once inhabited the Mississippi and Ohio Valleys is rare. Bob's life-long fascination with the people who called *his* home *their* home over a thousand years ago has culminated with the artistic resurrection of *their* art with *his* art. This show is a tribute to a noble but mysterious people from whom we have much to learn, to admire and to remember.
